

Setting up your template for print:

The outline in pink is the finished size your folder will be cut by the die cutter

Background Graphics - You must ensure that your graphics **overlap** the pink line by a minimum of **3mm** (this is called bleed)

Text - You must ensure that your text is kept **10mm inside** the pink line

Final Print Artwork - Supplied as a PDF with outlined or embeded text.

If you have included bleed correctly your finished artwork will be 3mm bigger the pink outline

Do not include the cutter outline on your finished artwork
